Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Sunday 05 Dec 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy, with morning rain and hill snow easing. Showers following.

Today:
Cloudy with outbreaks of rain easing and any snow confined to highest hills. Further showers are then expected to spread inland from the North Sea, but most western areas drier. Some brighter spells possible, mainly in the south. Maximum temperature 6 deg C (43 deg F).

Tonight:
Rather cloudy evening, with limited clear spells but most parts dry. Chance of frost. Cloud thickens from the west through the early hours, with rain and stronger winds by dawn. Minimum temperature 0 deg C (32 deg F).

Monday:
Rain, perhaps brief snow, spreading east during the morning, persistent and heavy with gusty winds. Snow quickly becoming confined to hills, before clearing to sunny spells and blustery wintry showers. Maximum temperature 5 deg C (41 deg F).

Outlook for Tuesday to Thursday:
Frosty start Tuesday. Turning very windy, with rain and snow spreading east. Snow becoming confined to hills later. Winds easing Wednesday and Thursday but showers or more prolonged rain likely.
